

COVID-19 Trends at A.G. Rhodes

The following two pages of bar charts display the numbers of resident and staff COVID-19 cases that have emerged each month in our A.G. Rhodes communities since our first cases emerged in April 2020.

The staff numbers also include those who are employed by our dietary and therapy partner organizations.

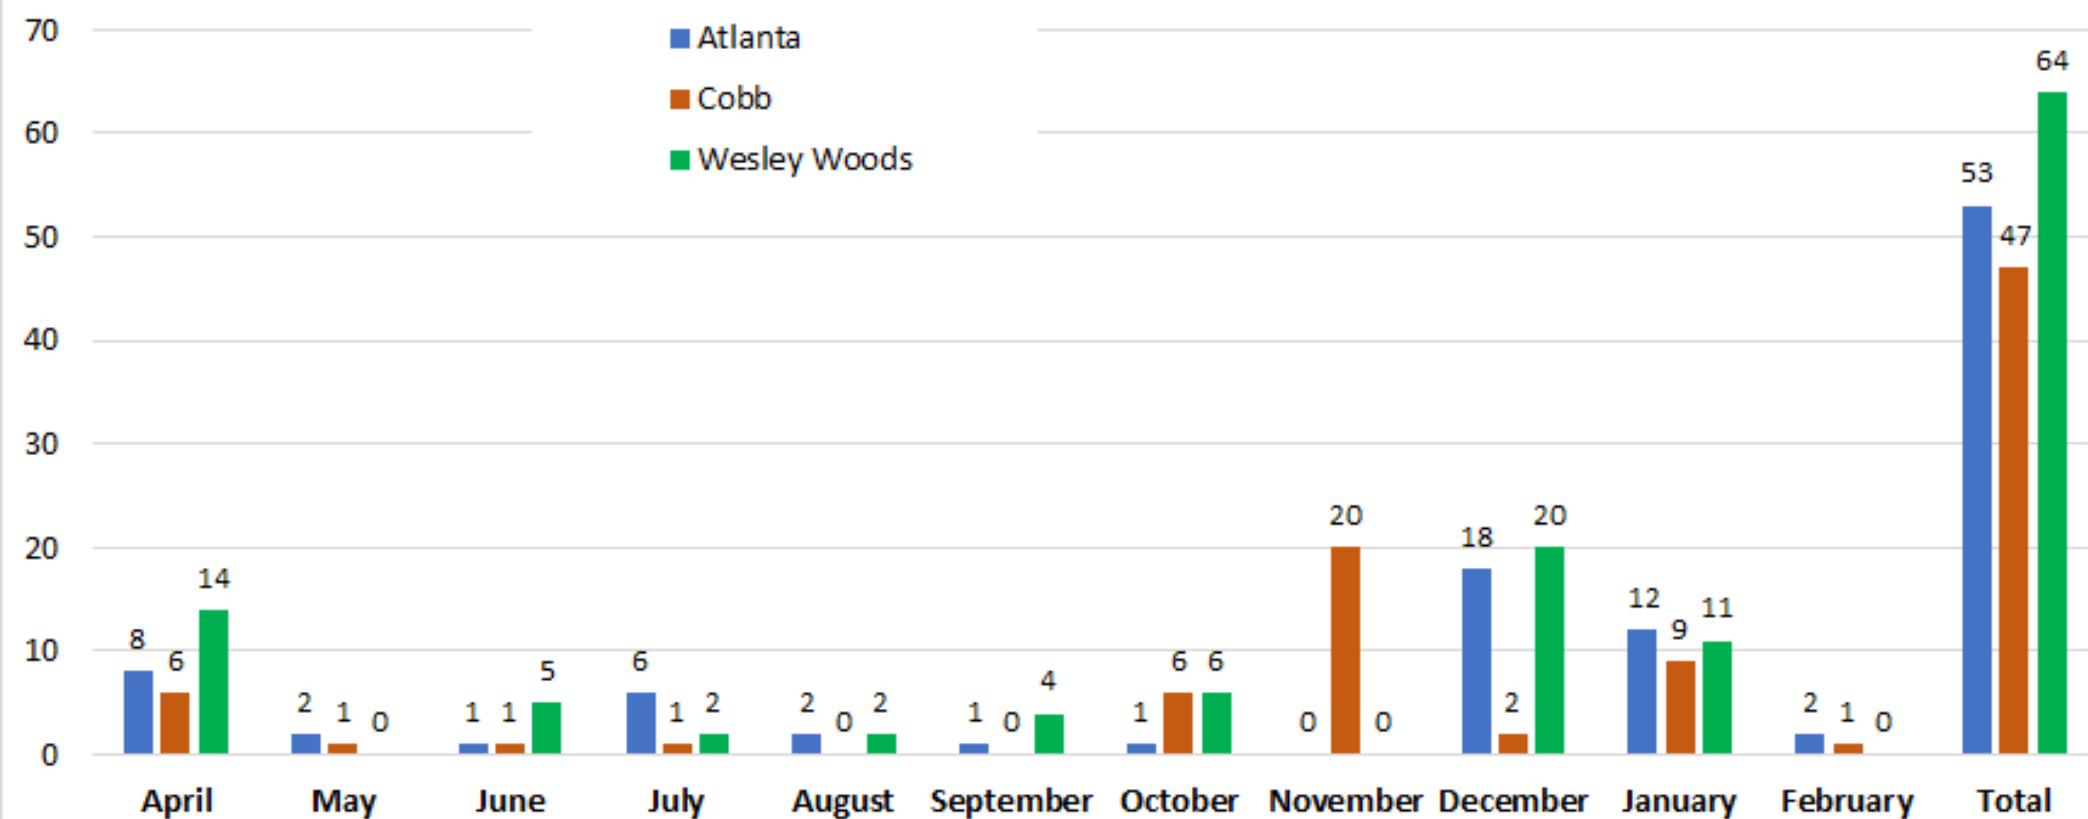

These graphs will be updated monthly. To see the latest numbers of total cases in our communities, visit **www.agrhodes.org/covid-19-confirmed-cases**.

Resident COVID-19 Cases

Current as of February 28, 2021

Staff COVID-19 Cases

Current as of February 28, 2021
